

A high-angle, top-down photograph of a man diving from a boat into the ocean. The man is in mid-air, with his arms and legs spread wide in a star-like shape. He is wearing dark swim trunks. The water is dark blue with visible ripples and a slight wake from the boat. The boat's deck, made of light-colored wooden planks, is visible at the bottom of the frame. On the deck, there is a scuba diving mask and snorkel. The overall mood is one of freedom and adventure.

Autumn Engine Campaign

Effortless control, wherever the journey takes you

Made to Move You

Ease at sea

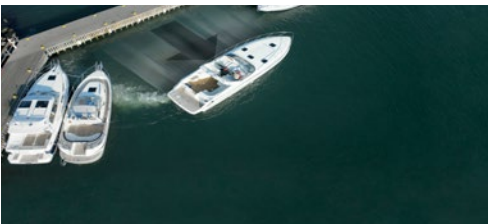

From your home shores to the great beyond, every trip at sea should make you crave another. At Volvo Penta, we work on innovations to help shape the future of leisure crafts – offering services, technology, and power solutions designed to enhance your adventure.

Seamless enjoyment

From propulsion systems to user interfaces and support, our pleasure craft solutions are developed to work as an integrated experience. And every engine, driveline, feature, and accessory is designed with ease of use, reliability, and comfort in mind to enhance your experience at sea.

Volvo Penta Features and Accessories

EVC Upgrade Configurator

D1-20/30 and D2-50/60/75

Extremely reliable, clean, quiet and with minimal vibrations. High torque at low rpm makes for easy maneuvering. Freshwater cooling as standard equipment. Ready for high-capacity hot water take-off. Minimal emission levels.

Low rpm – supreme comfort

The maximum Volvo Penta D series engine speed is low, which means 1,800 to 2,300 rpm at cruising speed. This results in minimal vibrations and low noise levels, which drop even further with the sailboat drive.

Torque for sailboats

Our diesel engines have high torque even at low engine speed. This means plenty of power and quick responses to all your engine commands. The torque also helps drive the industry's most powerful alternators.

Efficient charging

All D1 & D2 engines are fitted with high-capacity charging. The 115 A alternator has an built in charging sensor that provides the correct battery charging voltage.

Freshwater cooling

The engine has fresh water cooling as standard. This reduces risk of internal corrosion and allows the engine to maintain an even and optimal working temperature under all conditions.

20% DISCOUNT

D1-20/30 & D2-50/60/75

Excluding propeller.
With reverse gear or saildrive.

D4-145/150/175/230/270/300/320

The Volvo Penta D4 is a 3.7-liter, in-line 4-cylinder diesel engine built for dependable performance, fuel efficiency, and low maintenance. The D4 delivers smooth, responsive power in a compact, durable package - ideal for leisure boaters who demand more from every nautical mile.

Optimized Performance

The D4 is engineered for immediate response and smooth, confident power delivery. Its advanced turbocharging, common-rail fuel injection, and precision engine management work together to deliver strong acceleration, low vibration, and quiet operation - all in a compact, 4-cylinder package. Whether you're cruising, towing, or maneuvering, the D4 delivers performance that feels effortless.

Fuel Efficiency That Goes the Distance

With its intelligent fuel injection system and optimized driveline, the D4 is built to maximize every drop of diesel. The engine's control unit continuously adjusts performance to reduce fuel consumption without compromising power. The result? Lower running costs, longer range, and more time enjoying the water.

D6 IPS

D6 Inboard

D6 DPI

The Volvo Penta D6 is a 5.5-liter, in-line 6-cylinder diesel engine engineered for exceptional performance, fuel efficiency, and long-term reliability. The D6 delivers smooth, responsive power with low noise and vibration — making every journey more enjoyable.

Unique Marine Torque

The D6 is engineered with Volvo Penta's signature marine torque curve — delivering high torque throughout the whole rpm range. This means faster acceleration onto planing, confident handling in tight maneuvers, and high thrust power even under heavy load. Whether you're cruising at high speed or navigating a busy marina, the D6 responds instantly and smoothly, giving you total control and a more enjoyable ride in all sea conditions.

Electronic Vessel Control

Volvo Penta's Electronic Vessel Control (EVC) system — a smart, unified platform that connects engine, drive, and controls. With EVC, you gain access to advanced features like Assisted Docking, Glass Cockpit integration, and Dynamic Positioning System. These technologies work together to simplify navigation, enhance safety, and give you precise control in every situation — from open water to tight marina spaces.

Gasoline V6 & V8 Aquamatic sterndrive

Efficient Power. Smooth Performance.

Discover dynamic performance in a compact package. The Volvo Penta Aquamatic Sterndrive V6 pairs a powerful 6-cylinder, 4.3-liter direct-injected gasoline engine with the precision of the DPS/TCC Duoprop or the SX drive. Freshwater-cooled and fully integrated, this system delivers agile handling, quick acceleration, and a seamless driving experience on the water.

V6-200/250/280

Excluding propeller, only complete package

Bold Power. Clean Performance.

Push further with the commanding performance of the Volvo Penta Aquamatic Sterndrive V8. Available in 5.3-liter or 6.2-liter V8 configurations, this freshwater-cooled, direct-injected gasoline engine with catalyst technology offers impressive power with reduced emissions. Coupled with the DPS/TCC Duoprop or SX drive, it delivers outstanding acceleration, smooth control, and refined handling — setting a new standard in marine gas propulsion.

V8-300/350/380/430

Excluding propeller, only complete package

Compact, Lightweight Design

Aluminum engine block and low-friction components enhance the power-to-weight ratio and simplify installation.

Direct Injection Efficiency

Maximizes fuel energy with high compression, reducing both fuel consumption and emissions.

Variable Valve Timing

Optimizes performance across the rpm range for stronger torque and smoother acceleration.

Freshwater Cooling System

Closed-loop cooling prevents internal corrosion, extending engine life and boosting resale value.

Easy Drain System

Drains raw water in minutes—even while afloat—thanks to a smart anti-siphon valve design.

Electronic Vessel Control

Add features such as Glass Cockpit, Joystick Docking and Dynamic Positioning to enhance your experience.

15% DISCOUNT

Switch to a new propeller

A worn propeller will impact your boat experience more than you can imagine. There are several signs that affect the performance of your engine and your boat that you should be aware of. You may feel that your boat is sluggish and heavy or the engine can over-speed when running at full throttle. Even fuel economy can be negatively affected.

The only way forward

For Volvo Penta, the propellers will always be designed as a part of a complete system. It is the only way. Regardless of whether you have a power boat or a sailing boat, there is an original Volvo Penta propeller that is entirely designed for your needs. If you are uncertain about which type of propeller suits your driveline and boat type, you can always contact your Volvo Penta dealer. They will know what type of propeller best suits your driveline.

Service and Support

Double your spare parts warranty

Genuine Volvo Penta parts and accessories are covered by our 12-month standard warranty. When they are delivered and installed by an authorized Volvo Penta dealer, we extend the warranty to 24 months. This also applies to labor.

Global service network

Every Volvo Penta product has the support of a global network of dealers who are present in more than 130 countries. The dealers are specialists in the maintenance and repair of your Volvo Penta products and only use genuine Volvo Penta parts.

Up to 5 years of protection

Our new marine warranty package offers you peace of mind through our extensive global coverage, which ensures you are equipped with reliable support wherever your journey may take you. For the first 3 years, our marine warranty covers your entire propulsion package – from helm to prop. For the subsequent 2 years, the warranty covers all major components.

Volvo Penta Action Service

As your first line of contact, our global dealer network is backed by Volvo Penta Action Service, our phone-based breakdown and support service, providing 24-hour assistance every day of the year – call +32 9 255 69 67.
